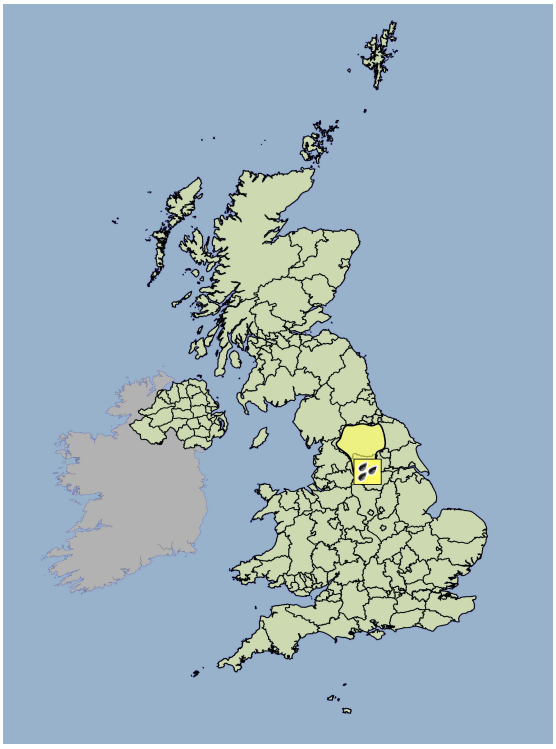
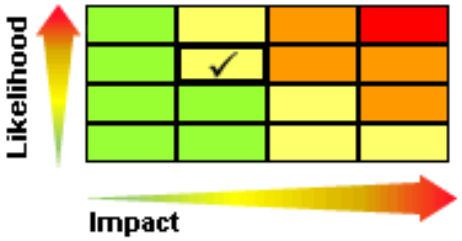
National Severe Weather Warning Service





Chief Forecasters Assessment
An area of low pressure is expected to move east across southern Scotland on Sunday morning bringing a spell of rain that could be heavy at times. Amounts of rainfall are not expected to be excessive, a further 10 to 20 mm falling in places, however rivers remain high and are expected to respond to the forecast rainfall. This will introduce the risk of some minor river flooding.

Although the rain will ease during the early afternoon it is expected that there will be a continued risk of minor river flooding until evening.

There remains some uncertainty in the track of the associated low and hence exact rainfall amounts. As such this Alert is likely to be updated as confidence in the low track and rainfall amounts increase.

The Met Office have issued a **Yellow Alert** of **Rain**

Valid from **06:00 on Sun, 29th Nov 2015** until **13:00 on Sun, 29th Nov 2015**

Outbreaks of rain on Sunday morning and early afternoon are expected to be heavy at times. Although rainfall accumulations are not expected to be very large rivers remain high from previous rainfall and are expected to respond introducing a risk of minor river flooding. Although the rain will ease during the early afternoon it is expected that there will be a continued risk of minor river flooding until evening.

Please be aware of the risk of some disruption due to river flooding.
